

Ex No. 2	CONVERTER APP
Date: 12/07/2019	

Aim:

* To develop a Java application for the conversion of Currency, Distance and Time.

Requirements:

* Develop a Java application to convert the currencies such as Dollar to INR and vice versa, EURO to INR and vice versa, Yen to INR and vice versa, the distance such as Meter to KM and vice versa, Miler to KM and vice versa, the time such as Hours to Minutes and vice versa, Hours to Seconds and vice versa.

* Create a package Converter Library and create the classes CurrencyConverter, DistanceCoverter and Time Converter.

* Create a package Converter App and create the class Calculation with main function and create object of Converter App and display the conversion() function

Algorithm:

Step 1: Declare a package Converter Library.

Step 2: Declare the classes CurrencyConverter, DistanceCoverter and Time Converter.

Step 3: Declare a constructor with initial attributes.

Step 4: Declare a package Converter App.

Step 5: Declare a class Calculation with static man functions.

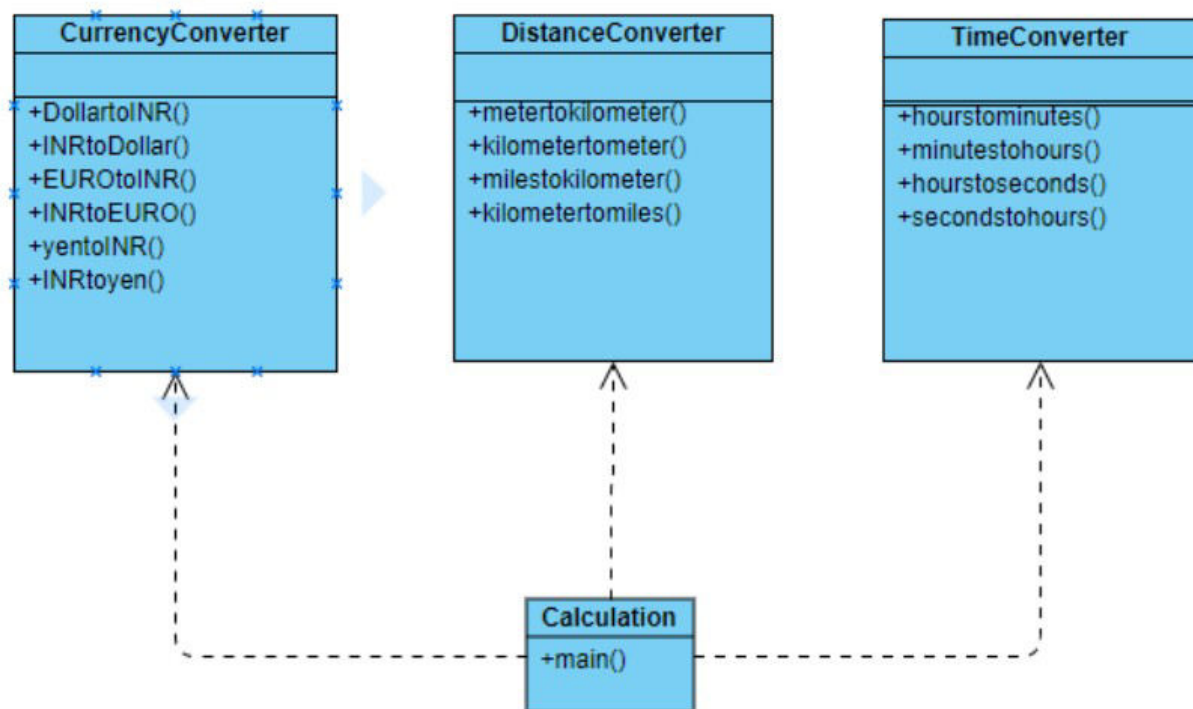

Step 6: Create objects with Dollar, INR, EURO, Yen, Hours, Minutes, Seconds, Meter, Miles, KM.

Step 7: Get the input from the user.

Step 8: Calculate the constructors.

Step 9: Display the result.
